The day of the oral assessment, partners will be chosen at random for a newscast about a natural disaster or environmental crisis. One person will be the anchor in the news studio asking questions and the other will be the on location reporter who is in the Spanish speaking country where the crisis happened.

You’ll have to give the following information:

- What happened and when (be sure to include details)
- What the effects were (how many people died, were injured, buildings and homes destroyed, etc.)
- What needs to be done (what the residents need to do, what volunteers can do, what other countries should do to help, etc)

Each student must use 4 SUBJUNCTIVE verbs in the presentation.
